Kamela Williamson is a Full Stack developer with two years of experience.

TECHNICAL SKILLS

- HTML, CSS, Git, VSCode, Design, JavaScript, Python, Django, Agile, React.js, Ruby

PROFESSIONAL EXPERIENCE

FREELANCE

Phoenix, AZ

Full Stack Web Developer

2021-Present

- Create semantically structured full stack web applications and static websites for different clients across small-sized businesses. Communicate with customers regularly to get ahead of any issues.
- Explore using new technologies on the job when possible and always looking to develop ongoing technical knowledge while delivering a strong client service focus.
- Demonstrated experience in using testing tools such as W3C validators and development tools like Postman.

Select Client Projects created with HTML, CSS, and JavaScript:

- Programmed on-demand background color changer for a client(twitch streamer). Randomly generates hex colors from 16 million available possibilities.
- Built Magic 8 Ball web app and static website for a client who does online tarot readings and art therapy.
- Created Fortune Cookie web app for a local Chinese restaurant increasing traffic to their website by 80%.

KENZIE ACADEMY

Remote

Full Stack Developer

2020-2021

- Completed a 12-month online technical program with a project-based curriculum with a fully remote team.
- Succeeded in an agile environment meeting deadlines on 4 group projects. Supervised 3 of those projects and created the design while spearheading an independent group to study with outside of the classroom.
- Co-created workout app on a 3-person team in 12 days as a scrum master built with React/Redux, Youtube API, and Bootstrap while attaining hands-on experience through code reviews, merging pull requests from multiple team members, and Git conflict resolution.
- Developed a Twitter clone as the PM, lead designer, and developer on a 3-person team in 2 weeks where features like authentication, following users, liking/unliking posts, & posting tweets were implemented with React + Redux, Bootstrap, and a backend API.
- Collaborated on a recipe app as a product manager, designer, and developer on a 4-person team in 12 days.
- Incorporated authentication and user experience with an emphasis on user profile customization using Django, Bootstrap, and a food API from Spoonacular.
